

## **Clerks Report July 2021**

### Planning Decisions

Since publishing the agenda there has been another application granted – Quarr Abbey - Listed Building Consent for replacement waterproof membrane and re-slate pitched roofs

### Lower Green Post

Lushington Landscaping are having issues with obtaining a single post as they are so busy and they would have to stop general production to make one. They also cannot give us a quote as they are not sure how long it would take to replace. They also feel they would have problems with access during the summer months. Perhaps we should agree to put a bolt through it until Lushington are in a position to replace.

### Bird Project

The interpretation board is due to be completed on 22<sup>nd</sup> July so I will arrange installation shortly after confirmation.

### Speed reactive sign on Fishbourne Lane

This is on the agenda, but I have had a reply from Island Roads:  
The electricians have inspected the sign and removed it to do further testing in the workshop, as they confirmed the sign was only working intermittently.  
We aim to replace the repaired sign by the end of this week.

### Facebook Page

Unfortunately, I'm not getting any traffic on the FB page so if you could like and share it would be much appreciated!
